Portfolio: <https://abrar-khan123.github.io/Portfolio/>

PROFESSIONAL SUMMARY

Computer Science Engineering graduate (CGPA 8.19) with hands-on experience across four internships spanning Generative AI, AI/ML, Java, and Python full-stack development. Skilled in Python, prompt engineering, and building end-to-end AI-driven applications. Seeking a software engineering or AI/ML role to apply strong programming fundamentals and a fast-learning mindset to real-world problems.

EDUCATION

B.Tech, Computer Science Engineering — Chebrolu Engineering College, Guntur (JNTU-K) *CGPA: 8.19*
Intermediate (MPC) — N.K.R. Jr. College, Repalle, Board of Intermediate Education, Andhra Pradesh *2022 — 93%*
10th Class — Z.P. High School, Pallikona, Board of Secondary Education, Andhra Pradesh *2020 — 91%*

TECHNICAL SKILLS

Languages: Python, Java

Web Development: HTML, CSS, JavaScript (Fundamentals)

Tools & Platforms: Git, VS Code, AWS, Jenkins

Core Concepts: Object-Oriented Programming, Data Structures, Artificial Intelligence Fundamentals, Generative AI, Prompt Engineering

INTERNSHIP EXPERIENCE

Generative AI Intern — Blackbucks *May 2025 – Jul 2025*

- Studied and applied prompt engineering techniques to guide large language model outputs for varied use cases.
- Explored core generative AI concepts, including model behavior, output tuning, and practical application design.

AI & ML Intern — SmartBridge & APSICHE:- <https://github.com/abrar-khan123/Pollen-s-Profling-Automated-Classification-of-Pollen-Grains> *May 2025 – Jul 2025*

- Built foundational knowledge of artificial intelligence and machine learning workflows, from data preparation to model evaluation.
- Applied AI/ML concepts to hands-on exercises, strengthening practical understanding of model training and testing.

Java Programming Intern — MicroIT *May 2025 – Jun 2025*

- Strengthened core Java programming skills through applied coding exercises and small application development tasks.
- Practiced object-oriented design principles to build structured, maintainable Java applications.

Python Full Stack Intern — ExcelR *Jun 2024 – Jul 2024*

- Developed working knowledge of both frontend and backend technologies within a Python-based full-stack workflow.
- Built and tested application components end-to-end, reinforcing full-stack development fundamentals.

PROJECTS

Forest Wildfire Detection System:- <https://github.com/abrar-khan123/A-Deep-Learning-Based-Experiment-on-Forest-Wildfire-Detection-in-Machine-Vision-Course>

- Developed a deep learning-based computer vision system using Convolutional Neural Networks (CNNs) to detect wildfires from satellite imagery.
- Applied image preprocessing and model training techniques to improve early-stage fire pattern recognition.

Personal AI Assistant:- <https://github.com/abrar-khan123/IGRIS>

- Built a Python-based personal AI assistant integrating natural language processing (NLP) and speech recognition for voice-driven task automation.
- Designed modular components to handle command interpretation, task execution, and user interaction.

Community Service Project — Vemuru Village

- Organized and led health and hygiene awareness programs, coordinating outreach activities for the local community.

CERTIFICATIONS

- IBM — Getting Started with Artificial Intelligence
- NPTEL — Cryptography & Network Security
- Python Full Stack, DevOps, Java Programming, and Data Structures
- TCS iON National Qualifier Test (NQT) — IT, Feb 2026 (Score: 51.60%)

CORE STRENGTHS

Fast Learner • Strong Work Ethic • Teamwork & Communication • Time Management & Reliability
